

# CK-1 Kit

## CUSTOM INTERFACE KIT

### APPLICATION

Extron's CK-1 Kit is the industry's first and only "do-it-yourself" custom interface kit. Simply choose the interface and cables required for your demo or rental application and Extron will custom build the CK-1 Kit for one flat price. Build the CK-1 Kit as a universal PC, laptop and portable interface solution or make it the ultimate workstation solution capable of handling anything up to 127 kHz workstations. The CK-1 Kit's durable high density polyethylene case and hard-foam cut-outs protect your investment by shielding all of the interface and cable equipment from accidental shipping damage. See the section below and choose one of the listed interfaces, four MBC Cables, two MBC Buffers and Extron will include an SRI-200 (Automatic Scan Rate Reader) an interface alignment tool (tweezer), a flashlight and all of the required user's manuals.

### FEATURES

Select ONE of any Universal Extron computer-video interfaces:
