

Custom Engraving Services

INLINE is pleased to offer custom engraving services for the IN93XX series A/V connector modules. You can use the engraving to clearly indicate signal type, input numbers or any other labeling required to make signal connections clear and easy.

Engraving Specifications

Standard Letter Size: 0.08" / 2mm Tall

Standard Font: Sans Serif (similar to Helvetica).

Engraving is all capital letters.

Engraving Color:

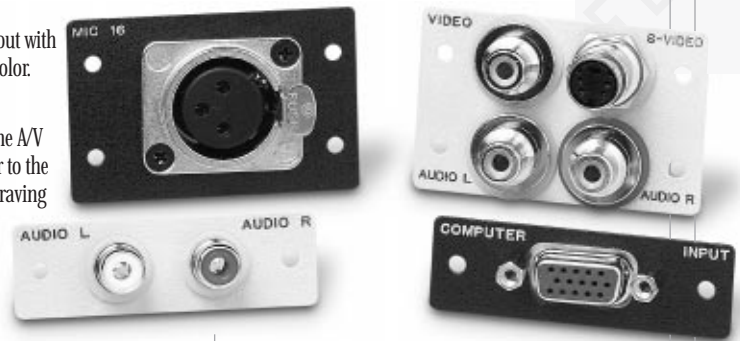

White Connector Modules: Black Engraving

Black Connector Modules: White Engraving

Engraving Process: Letters / Numbers / Symbols are routed out with a rotating bit, then filled with color.

Order Information

To order engraving for any of the A/V connector modules, please refer to the instructions below and the Engraving Order Forms located on pages 146 & 147. You can copy the Engraving Order Forms from the catalog or download PDF versions of these forms from the INLINE web site at <http://www.inlineinc.com/forms>

Instructions For Custom Engraving Orders

1. Check the Module Size

Determine the size of the connector module that is to be engraved. If you are ordering engraving single size modules, use **Engraving Order Form – Single** on page 146. For double size modules, use **Engraving Order Form – Double** on page 147. Please contact INLINE if you need engraving on a triple or quad size plate.

2. Specify Connector Module & Quantity

Completely fill in the information at the top of the Engraving Order Form. Be sure to include the Purchase Order number, the model of the connector module to be engraved as well as the number of modules to receive identical engraving.

3. Fill in the Boxes

The Engraving Order Forms have a template with "X" marks showing where engraving can be located on the module. Fill in the boxes indicating the text and location for the engraving. Each box will allow one of the following: a letter, a number, or a blank space. Any box that is left blank will not be engraved.

Unless otherwise specified, INLINE will left-justify all engraving that is selected for the left side of the AV modular

plate, and right justify engraving that is selected for the right side of the modular plate. The left & right justification creates a uniform look for the AV modular plates once they are installed onto the interface / faceplate.

Corner Engraving

Each corner of the template has sixteen boxes that should be used to indicate the letters, words, or numbers that are to be engraved.

Center Engraving

Center engraving is only available for XLR, RJ-45, and RJ-11 double size connector modules.

Compatible Modules: IN9358D, IN9359D, IN9364D, IN9365D, IN9366D, IN9391D, IN9394D, IN9395D, IN9396D, IN9397D, IN9453D, IN9454D

The Top Center and Bottom Center sections of the template each contain eight boxes that may be used to indicate the letters, words, or numbers that are to be engraved.

4. Get Engraving Prices

You can compute the cost of engraving services using the chart in the 1999 / 2000 Dealer Price List. For assistance with engraving prices, call INLINE at 714-921-4100 or 800-882-7117.

5. Submit Your Engraving Order and Purchase Order

Submit one Engraving Order Form for every unique plate design and every module model ordered. If identical engraving is required on several modules then submit only one order form for each model number ordered. Be sure to include a purchase order that specifically authorizes purchase of the A/V connector modules as well as the engraving service charges. Pricing for engraving services is located in the 1999 / 2000 Dealer Price List.

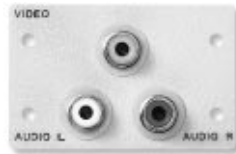

Fax Submission:

Fax the completed engraving order form(s) and your purchase order to INLINE at 714-921-4160.

Email Submission:

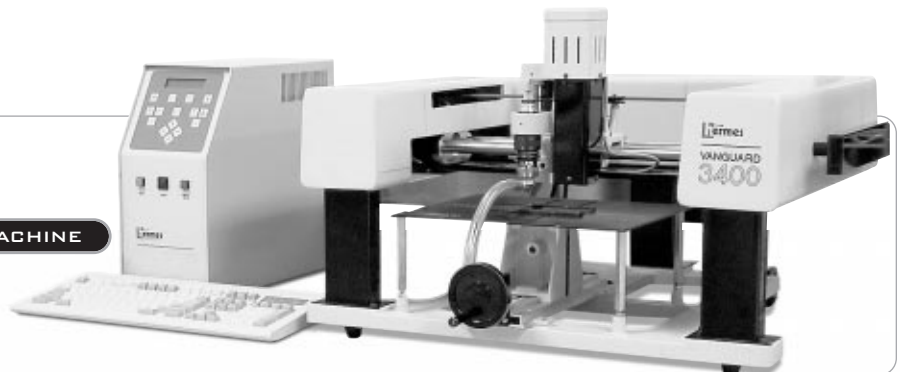

If you have downloaded the PDF version of the order forms, you can complete the form(s) and submit them to Inline via email at the following address: engraving@inlineinc.com
