

CPM101 Modular A/V Connector Plate

CPM101W

Tel 714. 921. 4100
Fax 714. 921. 4160

FEATURES

- Unit Accepts up to Four Audio / Video Connector Modules to Create a Custom A/V Connector Plate Optimized for Each Application
- Modular Design Prevents Obsolescence
- Dozens of Connector Module Models Available Featuring Popular Video, Audio, Phone, Data and Control Connectors
- Available in Two Finishes:
CPM101B - Black
CPM101W - White (PMS Cool Grey 3)
- Mounts in Standard 1-Gang Junction Box (Junction Box Not Included)
- Custom Engraving Available to Label Individual Connector Modules (Additional Charge for Engraving)

The **CPM101** is a modular connector plate designed for installation in a wall, podium, boardroom table or other audiovisual / presentation furniture. The unit mounts in a standard single gang junction box (junction box must be ordered separately). The **CPM101** provides a clean, simple way to specify and install a wide variety of audiovisual connectors. Each connector can be terminated before mounting it in the **CPM101** faceplate. Connector modules are held in place in the **CPM101** faceplate with 3/32" hex screws (included with each connector module). An **IN9334** 3/32" allen wrench is provided with each **CPM101**.

Modular Design Maximizes System Flexibility - The **CPM101** lets system designers specify the precise A/V connectors needed for each installation. The modular approach also prevents obsolescence since A/V connector modules can easily be changed to accommodate evolving system requirements.

Accelerate System Installation - The **CPM101** can provide quick turn around times for fast track installations. A/V system integrators can keep the **CPM101** and popular A/V connector modules in stock, putting together a customized connector plate in a fraction of the time required for a traditional custom A/V connector plate.

A/V Connector Modules - The **CPM101** accepts up to four single size connector modules (ordered separately). Dozens of modules are available in black or white finish featuring popular video, audio, phone, data, and control connectors. Most connector modules take up a single space, however a few larger connectors such as XLR require a double size connector module.

Custom Engraving - Inline can provide custom engraving services to label the connector modules as required for various applications. Please call to verify pricing and lead time for custom engraving.

Specialized Modules - Connector modules are also available featuring a variety of specialized connectors such as contact closure switches, 3-pin / 4-pin / 6-pin mini XLR, and 6-pin mini DIN connectors for PS2 type mouse. Many additional specialized connectors are available by special order.

SPECIFICATIONS

A/V CONNECTOR MODULES:

CPM101 Faceplate accepts up to (4) IN93XX A/V Connector Modules

GENERAL:

Finishes:	CPM101B - Black	CPM101W - White
Mounting:	Mounts in Standard Single Gang Junction Box (Junction Box Ordered Separately)	
Accessories Included:	IN9334 3/32" Allen Wrench for IN93XX Connector Module Set Screws	
Shipping Weight:	1 lbs. / 0.5 Kg	Product Weight: 0.2 lbs / 0.1 Kg
Dimensions:	4.5" x 2.5" x 0.1" / 11.4 x 6.4 x 0.25 cm	
Faceplate Thickness:	0.1" / 2mm	

OPTIONAL INSTALLATION ACCESSORIES:

IN9186	1-Gang Junction Box, 2.5" Deep
IN9187	1-Gang Junction Box, 3.5" Deep
IN9154	3/4" EMT Conduit Coupler, Set-Screw Type
IN9155	3/4" Romex Connector, Cable Strain Relief

Blank Plates - are available in single, double, triple or quad size. These can be used to fill extra space above or below other modules and may be engraved to act as labels for adjacent connector modules. The double, triple and quad size blank plates provide maximum flexibility for installers who wish to mount their own connectors to accommodate unique configurations.
