

CPM101MK

Modular AV Connector Panel for Single MK Boxes Preliminary Data Sheet

- **Modular Faceplate Accepts Up to Three A/V Connector Modules** to Create a Custom A/V Connector Plate Optimized for Each Application
- **Modular Design Prevents Obsolescence**
- **Over 75 Connector Modules Available** Featuring Popular Video, Audio, Phone, Data, and Control Connectors
- **Specially Designed for UK and Selected Asian Countries that Use MK Junction Boxes** - Faceplate Mounts in Standard Single MK Flush, Dry Lining or Surface Boxes
- **Custom Engraving Available** to Label Individual Connector Modules (Additional Charge for Engraving)
- **Available in Black or White Finish**
- **Beveled Edges Match Appearance of CIA100 Series Installation Interfaces**

The CPM101MK is a modular A/V connector plate designed for installation in a wall, podium, boardroom table or other audiovisual / presentation furniture. It is specially designed for use in the UK and select Asian countries that use MK style junction boxes.

The CPM101MK provides a clean, simple way to specify and install a wide variety of audiovisual connectors. Each connector can be terminated before mounting it in the modular faceplate. Connector modules are held in place in the faceplate with 3/32" hex screws (included with each connector module). An IN9334 3/32" allen wrench is provided with each CPM101MK modular plate.

Modular Design Maximizes System Flexibility

The CPM101MK lets system designers specify the precise A/V connectors needed for each installation. The modular approach also prevents obsolescence since A/V connector modules can easily be changed to accommodate evolving system requirements.

Accelerate System Installation

The CPM101MK can provide quick turn around times for fast track installations. A/V system integrators can keep the CPM101MK modular faceplates and popular A/V connector modules in stock, putting together a customized connector plate in a fraction of the time required for a traditional custom A/V connector plate.

A/V Connector Modules

CPM101MK units accept up to three single-size connector modules (ordered separately). Over 75 different modules are available in black or white finish featuring popular video, audio, phone, data, and control connectors.

Custom Engraving

INLINE can provide custom engraving services to label the connector modules as required for various applications. Please call to verify pricing and lead time for custom engraving.

Specialized Modules

Connector modules are also available featuring a variety of specialized connectors such as contact closure switches, 3-pin / 4-pin / 6-pin mini XLR, and 6-pin mini DIN connectors for PS2 type mouse. Many additional specialized connectors are available by special order.

CPM101MK Models

CPM101MK-1	Modular AV Connector Panel for Single MK Boxes, Holds up to 3 Single-Size AV Connector Modules - Black
CPM101MK-2	Modular AV Connector Panel for Single MK Boxes, Holds up to 3 Single-Size AV Connector Modules - White
