

# IN9172 Rack Mountable Modular A/V Connector Plate

The **IN9172** is a modular connector plate designed for installation in a standard 19" equipment rack. The **IN9172** provides a clean, simple way to specify and install a wide variety of audiovisual connectors.

**Modular Design Maximizes System Flexibility** - The **IN9172** lets system designers specify the precise A/V connectors needed for each installation. The modular approach also prevents obsolescence since A/V connector modules can easily be changed to accommodate evolving system requirements.

**Accelerate System Installation** - The **IN9172** can provide quick turn around times for fast track installations. A/V system integrators can keep the **IN9172** and popular A/V connector modules in stock, putting together a customized connector plate in a fraction of the time required for a traditional custom A/V connector plate.

**A/V Connector Modules** - The **IN9172** accepts up to 20 single size connector modules. Dozens of modules are available with popular video, audio, phone, data, and control connectors. Most connector modules take up a single space, however a few larger connectors such as XLR require a double size connector module. Each connector can be terminated before mounting it in the faceplate. Modules are held in place in the **IN9172** faceplate with 3/32" hex screws (included with each connector module). An **IN9334** 3/32" allen wrench is provided with each unit. *A/V modules are listed on reverse*

**Custom Engraving** - Inline can provide custom engraving services to label the connector modules as required for various applications. Please call to verify pricing and lead time for custom engraving.

**Lacer Bar** - The optional **IN9173** lacer bar can be mounted on the back side of the **IN9172** to provide enhanced cable management. The **IN9173** provides a neat way to dress cables and provide strain relief for cables terminated on the back of the connector modules.

**A/C Power Module** - The **IN9175** is an optional power module that mounts in the **IN9172**. This UL approved power unit takes up the same size as a quad blank plate and features two Edison style (**IN9175-1**) or two IEC style (**IN9175-2**) power outlets to provide A/C power for a computer or A/V equipment that will be located in front of the rack.

**Blank Plates** - are available in single, double, triple or quad size. These can be used to fill extra space above or below other modules and may be engraved to act as labels for adjacent connector modules. The double, triple and quad size blank plates provide maximum flexibility for installers who wish to mount their own connectors to accommodate special configurations.

## FEATURES

- Accepts up to 20 Audio / Video Connector Modules to Create a Custom A/V Connector Plate Optimized for Each Application
- Dozens of Connector Modules Available Featuring Popular Video, Audio, Phone, Data Connectors
- Modular Design Prevents Obsolescence
- Optional **IN9173** Lacer Bar Connects to Back Panel - Provides Strain Relief for Cable Connected to Back Side of Connector Modules
- Unit Can Hold One or More Optional **IN9175** Power Modules - Each Power Module Provides Two Edison Style or IEC Style Power Outlets
- Rack Mounts in 2U Rack Space

## SPECIFICATIONS

### A/V CONNECTOR MODULES:

Faceplate accepts up to (20) IN93XX A/V Connector Modules - See List on Reverse

### GENERAL:

|                       |   |
|-----------------------|---|
| Paint Finish:         | Black   |
| Mounting:             | 2U High Unit Mounts in EIA Standard 19" Equipment Rack Using Four Rack Screws (Provided by Installer) |
| Accessories Included: | IN9334 3/32" Allen Wrench for A/V Connector Module Set Screws   |
| Shipping Weight:      | 1 lbs. / 0.5 Kg   |
| Dimensions:           | Product Weight: 0.5 lbs / 0.2 Kg<br>3.5" x 19" x 0.1" / 8.9 x 48.3 x 0.25 cm                          |
| Faceplate Thickness:  | 0.1" / 0.25 cm  |

### OPTIONAL ACCESSORIES:

|                 |  |
|-----------------|--|
| <b>IN9173</b>   | Lacer Bar  |
| <b>IN9175-1</b> | A/C Power Module with (2) Edison Female Outlets<br>600 Watts Max. Per A/C Module |
| <b>IN9175-2</b> | A/C Power Module with (2) IEC Female Outlets<br>600 Watts Max. Per A/C Module    |

## A/V CONNECTOR MODULES - PARTIAL LIST

| Connector Module<br>Black / White | Description   | Module Size |
