IN9178W

The **IN9178** A/V connector plate is designed for installation in a wall, podium, conference table or other audiovisual / presentation furniture. The unit mounts in a standard 2-gang junction box (sold separately). The **IN9178** connector plate comes pre-configured with popular computer, video and audio connectors as indicated in the specification chart below.

Accelerate System Installation - The **IN9178** can provide quick turn around times for fast track installations. Since the plate features popular connectors found in typical connector plate configurations, it covers a wide variety of A/V system connector plate requirements. A/V system integrators can keep the **IN9178** in stock for immediate installation or order from Inline as needed for quick delivery. This eliminates time required to configure, quote and fabricate custom A/V connector plates.

Three Colors to Match Decor - Available in three different paint finishes, the **IN9178** complements the decor of boardrooms, training and presentation facilities, courtrooms and a variety of high tech / high profile environments. The connector plates can be ordered with Black enamel paint, White enamel paint (Cool Grey 3), or Silver metallic paint.

Silk Screening and Color Coding - All connectors are clearly marked with silk screen labels. The connectors are also color coded to help users make the correct computer, video and audio connections.

FEATURES

- A/V Connector Plate Mounts In Standard Double Gang Outlet Box
- Available in Three Finishes:
 - IN9178W: White
 - IN9178B: Black
 - IN9178S: Metallic Silver
- Fixed Connector Configuration Accommodates:
 - Computer Video with Audio
 - S-Video with Audio
 - Composite Video with Audio
- Protective Handles Extend to Guard Connectors and Attached Cables
