

## Setup and Control Software

- Configure and Control INLINE Products Including Matrix Switchers, Scan Doublers, Decoders, RS-232 to Relay Converters
- Macros Store Multiple Commands to Be Recalled and Sent with the Touch of a Single Button
- Easy Configuration of Pathfinder Matrix Switchers - Set Board Groups, RGB Delay, and the Number of Input / Output Ports on Reconfigurable Models
- Setup and Control Scan Doublers Including Advanced Functions Such as Output Format, Closed Caption Options, On-Screen Prompting
- For Windows™ Equipped PC Compatibles

## PRODUCT DESCRIPTION

**INLINE DIRECT** is powerful Windows based software you can use to configure and control the following **INLINE** products:

### Scan Doublers /Decoders

IN1024 IN1010

IN1240 IN1540

IN1222 IN1510

IN1224 IN1710

IN1422

IN1424 / IN1424RGB

### Matrix Switchers

Pathfinder Series

Pathfinder HR Series

### RS-232 to Relay Converters

IN6901 / IN6902

**Configure Pathfinder Matrix Switchers** - The software makes it easy for you to set up board groups, RGB delay, set the number of inputs and outputs (reconfigurable models only) and all other settings needed to configure the matrix for an installation or show.

**Control Pathfinder** - An input/output button matrix lets you execute switches live or stores a new set of input/output patches and executes them all simultaneously. Custom labels can be entered indicating the name of each input and output device.

**Set up and Control Scan Doublers** - You can easily adjust video and audio parameters,

change channels and engage advanced feature options such as closed caption selections. You can also specify text for the **IN1224 / IN1424** line prompter function which scrolls text across the screen on top of the video image.

**Relay Pack** - Control **IN6901 / IN6902** RS-232 to relay converters with a mouse click. The software can open, close, and toggle individual relays or all relays at once, giving you automatic control over lifts, screens, lighting or special effects equipment.

**24 Powerful Macros** - The Macro function lets you execute

up to five commands simultaneously. Click one of the macro buttons to simultaneously execute a switch on the matrix switcher, switch inputs on the scan doubler, and toggle relays on the **IN6901 / IN6902**. The macro notes section lets you write a description of each macro and also show the actual RS-232 strings you have stored for each macro.

**Comprehensive Online Manual** - A complete help file provides online help and instructions for all software operations.

## SPECIFICATIONS

### System Requirements:

<b>Operating System:</b>	Windows 3.1 or later
<b>Minimum Hardware:</b>	486 with 8 megs RAM
<b>Disk Space:</b>	Requires 2 Megabytes of Hard Drive space

### Optional Accessories:

#### Serial Control Cables

IN9134 - Pathfinder / IN1222, 9-Pin D female to 9-Pin D female, 12' long

IN9135 - Pathfinder HR / IN1224, 9-Pin D female to 9-Pin D female, 12' long

IN9136 - IN1424, 9-Pin D female to 5-Pin Phoenix, 12' long

IN9137 - IN1010 / IN1024, 9-Pin D female to 3-Pin Phoenix, 12' long

#### PC Serial Port Adapter

IN9138 - 25-Pin D Female to 9-Pin D Male, 1.5" long - adapts PC 25-pin serial port for use with serial cables listed above
